Certifications

Google UX Design
Credential ID: AT4K2YYOSDCR

Foundations of User Experience Design
Credential ID: LIOWEOIGC8HK

Education

Lovely Professional University
Computer Science and Engineering (Honours)
Aug 2018 – Oct 2022

A Software Engineer (UI) with a UX-driven mindset, where every pixel earns its place and every click tells a story. With over 3 years of experience crafting B2B SaaS products, I blend design intuition with front-end precision to build seamless, human-centered interfaces. I turn complex ideas into clean, responsive realities. For me, design isn't decoration – it's how software speaks.

Experience

Software Engineer - UI Acuvate Software	Aug 2025 - Present Hyderabad, India	
Software Engineer & Associative UX Designer C2S Technologies	May 2023 - Aug 2025 Hyderabad, India	
Intern C2S Technologies	Oct 2022 - Apr 2023 Hyderabad, India	

Roles and Responsiblities

- Led end-to-end UI/UX design for web-based SaaS products and internal enterprise tools from requirements to delivery.
- Transformed complex workflows and large-scale datasets into intuitive, minimal, and scalable user experiences.
- Built and maintained scalable design systems, reusable components, and style guides.
- Collaborated with product managers, stakeholders, and developers to align user needs with business goals.
- Worked closely with React/Next.js teams to ensure pixel-perfect, accessible UI implementation.
- Conducted UX research, usability testing, and iterative improvements based on feedback.
- Applied responsive design, accessibility (WCAG), and performance-focused UI principles across web applications.
- Designed and optimized landing pages and CMS-based interfaces (WordPress) with SEO-friendly UI patterns.
