Education

Lovely Professional University
Computer Science and Engineering (Honours)
Aug 2018 - Oct 2022

Narayana School & College
School and Intermediate – MPC
Jun 2013 - July 2018

A Software Engineer (UI) with a UX-driven mindset, where every pixel earns its place and every click tells a story. With over 3 years of experience crafting B2B SaaS products, I blend design intuition with front-end precision to build seamless, human-centered interfaces. I turn complex ideas into clean, responsive realities. For me, design isn't decoration – it's how software speaks.

Experience

Software Engineer – UI Acuvate Software		Aug 2025 – Present 📍 Hyderabad, India
